Product Description

Human Skeleton Model With Muscles & Ligaments- Scientific Educational Model

Human Muscles & Ligaments model is painted to show the muscles and ligaments. The left side of the skeleton shows the points of origin and the points of insertion of the muscles.

Bones can be moved to demonstrate limb movement.

The skeleton is life-size and is mounted on a heavy base.

Muscle and ligament tissue is colour differentiated.

This makes the skeleton stable.

This resource represents excellent value for money.

The base has wheels so the skeleton can be moved around in the lesson easily.

Size: 180cm tall.
