Product Description

Microprocessor pH Conductivity - Analytical Laboratory Equipment

Measurement of pH, conductivity-mV & temperature 16x2 Alphanumeric LCD

Display with pH combination electrode, conductivity cell and temperature probe.

PC Interface facility.

Accessories On Request

- a) pH combination electrode
- b) Gel filled epoxy body combination electrode
- c) Glass electrode
- d) Silver electrode
- e) Platinum electrode
- f) Reference electrode
- g) pH electrode stand
- h) Temperature probe
- i) Duracell battery or equivalent (9V DC)

j) ORP Electrode

k) Standard pH Buffer Solution
