Product Description

Spectrometer Prism (Extra Dense Flint) - Physics optical Equipment

Made from Borosilicate glass, these equilateral prisms are optically worked with 2 faces polished and most suitable for use with a spectrometer.

Optically worked with refractive index of 1.65

Equilateral,

2 sides polished

Extra dent flint glass

Size:- (a) 25x 25mm (Refractive index)-1.65

(b) 32x 32mm

(c) 38x 38mm
